

CAPABILITY STATEMENT

Steelcore Construction LLC specializes in distributing Utility Pole Structures, Pre-Engineered Metal Buildings (PEMB), and design-fabrication of structural steel, for infrastructure, commercial, and industrial building markets.

Having managed over 1,000 projects, we take pride in offering an exemplary combination of quality, experience, and collaboration to each of our clients

Core Competencies

- Utility Structures: Transmission, Street, and Lighting Poles and Assemblies
- National and local distribution with best pricing capabilities
- Steel packages and component provider through our distributor licenses
- Structural Steel (design, fabrication, delivery, and installation)
- Pre-Engineered Metal Buildings (design-build, pricing, delivery, and installation)
- Specialty product materials: steel, aluminum, concrete, hybrid

Differentiators

- **Mission:** In business for 35 years, with mission to serve our clients in an exemplary manner with the highest quality and integrity products available in the US
- **Best pricing:** Small Woman Owned Business without large administration, and without extra overhead costs added to our pricing
- **Efficient:** Project management services are exemplary, with a one-on-one communication regarding all details of the contracted work and one point of contact to answer all questions or concerns
- **Experience and Education:** Key personnel have over 30 years of experience in the steel and construction industry, including higher education degrees in project-management, business management, and business law
- **Rated** Top 5 Indiana construction company in scheduling and efficiency in communication in Construction Industry News, 2021
- **Awarded #1** Steel distributor in \$1M sales or above, in Mid-west region from NuCor Steel, 2019 and 2020
